Tracker Protect

TRACKER PROTECT - Always in control

Looking for a little more peace of mind on the road?

Tracker Protect allows you to track and monitor your vehicle anywhere within South Africa's borders. You are also able to set up notifications like In-App Car Guard and Standard Risk Notifications like main battery disconnect, border proximity and high-risk areas.

You have the added advantage of a Key Tag that allows Tracker's Monitoring Control Centre to proactively engage with you should your Tracker device register unauthorised movement of your vehicle without your Key Tag being detected, saving valuable time in the event of an emergency with this early notification system.

In addition, Tracker Protect gives you convenient Licence Reminders and even a Trip Logbook for tax purposes. Tracker Protect is suitable for all vehicles and is recognised by motor manufacturers and major insurers.

A traffic light on a black pole against a clear blue sky. The traffic light has three lenses; the bottom one is illuminated with a bright green light that forms a heart shape. To the right of the main traffic light is a smaller, side-mounted traffic light. A large, solid yellow circle is positioned in the upper right area of the image, containing the text 'Find the Tracker that works for you.' in a bold, dark grey font. The word 'Find' has a small white rectangular highlight under the 'i' and 'n' characters.
