Business Fleet Tracking

---

Taking care  
of business

# What drives us?

We'd like to help you take care of business. We understand that it's not just what information your business has, but how it uses it that makes a real difference. We've designed our products specifically to turn information about the way your business vehicles are used, into services that help you get to where you are going, in smarter, safer and more cost-effective ways.

## Always Visible.

With near real-time tracking, you'll have complete visibility of your fleet through various platforms, giving you accurate updates on arrival and departure times, as well as the status of jobs in progress.

## Always on Time.

Our Job Scheduling and Dispatching feature helps you improve the service to your customers by plotting driver routes, scheduling expected delivery times, call times on sites, arrivals and departures.

## Always Secure.

Our Theft Retrieval service consists of highly-trained recovery teams with an extensive partnership network of vehicles and aircraft. You can also enjoy added levels of security with cargo door, fuel cap, and passenger door sensors that alert you of any suspicious activity.

By making every drive easier, safer and more efficient, we give your business the freedom to thrive.

Tracker, taking care of business.

# Connect

Precision tracking of your vehicles, from anywhere.

Tracker Connect gives you all the benefits of Connect Lite, but with so many more added benefits. Use your computer, tablet or smartphone app for near real-time tracking. You can request more monthly reports, set more no-go zones, and allow your drivers to notify you in an emergency with an assist button. Whenever you receive an alert, so does Tracker, meaning our team can act swiftly if they detect any problems that need addressing.

# Features and benefits

## Reports

- 1 Trip Log (Detailed)**  
View time-captured, street-by-street, turn-by-turn activity of your vehicles.
- 2 Trip Log (Summary)**  
View total hours spent on the road and kilometres driven by your vehicles.
- 3 Trip Logbook**  
Capture separate trip information for both private and business use of your vehicles.
- 4 Vehicle Stop**  
View how long your vehicles stand for once their ignitions have been switched off. This is particularly useful, for example, in gauging how long your reps spend at each client.
- 5 Battery Trend**  
Monitor the battery life of your different vehicles, especially those that aren't in constant use. This helps ensure you don't have any downtime when you need to use them again.
- 6 Exception Status**  
Be alerted if your vehicle is speeding or braking harshly.
- 7 Notifications Sent**  
This report will provide you with a summary of all notifications that you have set up.

- 8 Speed Buffer**  
Gauge how well your drivers stay within speed limits by being notified how quickly they adapt to speed limits on different roads. You can also set your own speed limits for your vehicles.
- 9 Weekly Analysis**  
View weekly reports on your vehicles' average and top speeds, total distance travelled, and number of trips.
- 10 SMS Car Guard**  
Details the SMS car guard activations made by the driver by cellphone over a specified time frame.

## Zones

Through an interactive map on Tracker's web interface you can create, edit and monitor safe zones and no-go zones for each of your vehicles. The moment your vehicle leaves a safe zone or enters a no-go zone, you'll be notified.

## Assist Button

Allows your drivers to quickly alert you in the case of an emergency.

### Early Notification

If your vehicle is towed without your permission, has its power supply interrupted, enters a high risk area or approaches a border, we can send you an automatic notification. Depending on which Tracker product you choose, there are more notification options available for set up. (SMS charged @ standard rates and email is free)

### Health Check Service

Tracker is able to remotely check if your fitted devices are working properly.

### SMS Car Gaurd

Allows your driver to digitally “lock” the position of your vehicle. If it moves before it is “unlocked”, the driver will be notified by SMS (Standard SMS rates apply).

### Reports Scheduling

Decide what reports you would like to receive and then have them automatically emailed to you. For example, you can request to receive a trip report summary every day.

### Roaming

If your vehicles are going to leave South Africa, you can request that we activate roaming so you can continue to track the vehicle in neighbouring countries.

### SMS Position Request

Using SMS Position Request (SPR), you can request and receive the location of any of your vehicles via your cell phone. (Standard SMS rates apply)

### Theft Retrieval

If your vehicle is stolen or hijacked our National Emergency Centre, with the cooperation and assistance of the SAPS, is able to locate and secure your vehicle, and apprehend the thieves.

### Vehicle Grouping

Use the Tracker web or app interface to allocate your vehicles into different groups for monitoring and rule-setting. For example, if you are in the medical services industry, you could have one group dedicated to ambulances operating 24 hours, and another group dedicated to admin vehicles operating between 8am and 5pm.

### Optional Extras

Open Road Tolling Open Road Tolling helps you manage your e-Toll costs by recording every time your vehicle passes through an e-Toll gantry. This means you can compare your ORT records with bills from SANRAL for discrepancies or irregularities.

To care is to protect.
