

To care is to protect.

Business Fleet Tracking

Taking care
of business

What drives us?

We'd like to help you take care of business. We understand that it's not just what information your business has, but how it uses it that makes a real difference. We've designed our products specifically to turn information about the way your business vehicles are used, into services that help you get to where you are going, in smarter, safer and more cost-effective ways.

Always Visible.

With near real-time tracking, you'll have complete visibility of your fleet through various platforms, giving you accurate updates on arrival and departure times, as well as the status of jobs in progress.

Always on Time.

Our Job Scheduling and Dispatching feature helps you improve the service to your customers by plotting driver routes, scheduling expected delivery times, call times on sites, arrivals and departures.

Always Secure.

Our Theft Retrieval service consists of highly-trained recovery teams with an extensive partnership network of vehicles and aircraft. You can also enjoy added levels of security with cargo door, fuel cap, and passenger door sensors that alert you of any suspicious activity.

By making every drive easier, safer and more efficient, we give your business the freedom to thrive.

Tracker, taking care of business.

Extend 

Track and communicate with your teams at all times.

Extend gives you the full range of self-managed TomTom benefits, meaning no fleet is too big or small to handle. Enjoy in-cab communication with your drivers through their Personal Navigation Device. With job scheduling and dispatching, you'll help them stay on top of their tasks, arriving to their destinations safely, efficiently, and on time.

Features and benefits

Custom Reports

- 1 Exception Status**
Be alerted if your vehicle is speeding or braking harshly.
- 2 Site Visit Status**
Be alerted when your vehicle enters one of your predetermined zones.
- 3 Speed Buffer**
Gauge how well your drivers stay within speed limits by being notified how quickly they adapt to speed limits on different roads. You can also set your own speed limits for your vehicles.
- 4 Trip Log (Detailed)**
View time-captured, street-by-street, turn-by-turn activity of your vehicles.
- 5 Trip Log (Summary)**
View total hours spent on the road, kilometres driven and deliveries made by your vehicles.
- 6 Trip Logbook**
Capture separate trip information for both private and business use of your vehicles.
- 7 Vehicle Activity**
Be alerted if your vehicle is towed without your permission (Choose what exceptions you'd like to know, choose which you want to be notified of).

- 8 Vehicle Stop**
View how long your vehicles stand for once their ignitions have been switched off. This is particularly useful, for example, in gauging how long your reps spend at each client.
- 9 Weekly Analysis**
View weekly reports on your vehicles' average and top speeds, total distance travelled, and number of trips.

Driver Monitoring

Shows the performance (current and trend) of driver behavior, safety and efficiency.

Maintenance Scheduling

Track and plan for your vehicle's next maintenance interval so you can minimise downtime and ensure fleet efficiency.

Roaming

If your vehicles are going to leave South Africa, you can request that we activate roaming so you can continue to track the vehicle in neighbouring countries.

Reports Scheduling

Decide what reports you would like to receive and then have them automatically emailed to you. For example, you can request to receive a trip report summary every day.

Job Scheduling & Dispatching

A Personal Navigation Device (PND) is supplied which allows you to do the following:

- Driver Identification
- Job Scheduling and dispatching
- Live services (HD Traffic, Speed Cameras, Safety Alerts)

Unlimited Zones

Through an interactive map TomTom's web interface you can create, edit and monitor safe zones and no-go zones for each of your vehicles. The moment your vehicle leaves a safe zone or enters a no-go zone, you'll be notified by email only.

Vehicle Grouping

Use the TomTom web or app interface to allocate your vehicles into different groups for monitoring and rule-setting. For example, if you are in the medical services industry, you could have one group dedicated to ambulances operating 24 hours, and another group dedicated to admin vehicles operating between 8am and 5pm.

Optional Extras

Trip Log Remote

Easily switch between personal and business usage of a vehicle to accurately log business trips for tax purposes. Remotes at an additional cost.

To care is to protect.
